

JIN KIM

Los Angeles, CA, USA | (213) 951-5601 | jinkim04@g.ucla.edu | [LinkedIn](#) | [Portfolio](#)

EDUCATION

University of California, Los Angeles (UCLA)

Los Angeles, California

BS in Electrical Engineering

Expected June 2029

- **GPA:** 3.8/4.0 | **SAT:** 1560/1600 (Mathematics: 790/800, Reading & Writing: 770/800) | **International Baccalaureate:** 44/45
- **Relevant Coursework:** Multivariable Calculus, Linear Algebra, Differential Equations, Mechanics, Electricity & Circuits, C++
- **Extracurricular Involvement:** College Scholars Program, Relay For Life Finance Committee, Adobe Student Ambassador

WORK AND PROFESSIONAL EXPERIENCE

Soft Robotics & Bionics Lab | Seoul National University

Seoul, South Korea

Research Intern

Jul 2026 - Sep 2026

- Fabricated an inflatable magnetic tactile sensor with 3 Hall sensors capturing 9 magnetic-field channels for force estimation
- Designed molds in CAD and 3D-printed fixtures to fabricate the silicone sensor and secure hardware during robotic testing
- Automated robotic data collection and trained a 5-DOF magnet pose estimator using real data and physics-based simulations
- Developed force and tilt prediction models, reducing shear-force error 12.5% by incorporating estimated magnet position and tilt

Neuromeka

Seoul, South Korea

Robotics Software Engineering Intern

Jun 2026 - Aug 2026

- Validated robotic systems at 2 client sites in the cosmetics and hospitality industries through on-site integration and testing
- Refactored PC/PLC control logic for café robotic arms, restructuring task sequencing and inter-controller communication
- Debugged a prototype world action-model interface and validated the system through live demonstrations at 3 exhibitions
- Built a Flask dashboard with MySQL logging to help operators monitor daily processing counts in an automated robotic system

Human Computer Interaction Lab | UCLA

Los Angeles, California

Undergraduate Researcher

Apr 2026 - Jul 2026

- Designed an AI-assisted workflow that breaks broad scientific hypotheses into smaller testable claims and linked experiment plans
- Built a Node.js web prototype on Vercel with an interactive tree for exploring related hypotheses and planned experiments
- Implemented a RAG pipeline using PaperQA2 and Semantic Scholar to find relevant papers supporting proposed experiment plans
- Evaluated the prototype against an AI-chat baseline in user studies, measuring differences in planning and interpretation workflows

Genesis Alternative Ventures

Los Angeles, California

Contract Analyst

Feb 2026 - May 2026

- Led the analysis of 3 credit products adjacent to venture debt, assessing underwriting risk and fit with Genesis's existing portfolio
- Created side-by-side loan profiles showing how each product's collateral and repayment terms differ from the venture debt model
- Presented a 10+ page consulting report to Genesis general partners, recommending priority credit products for portfolio expansion

Newsight Tech Angels

Tokyo, Japan

Analyst Intern

Jun 2025 - Sep 2025

- Screened 5+ early-stage neurotech startups across Asia-Pacific, flagging key technical and launch risks for biotech investors
- Compared pricing and revenue models at 10 Asia-Pacific companies to identify promising market-entry approaches for clients
- Consulted university professors to assess scientific risks and validate technical claims behind neurotech investment opportunities

LEADERSHIP EXPERIENCE AND EXTRACURRICULAR INVOLVEMENT

Bruin Ventures

Los Angeles, California

Senior Analyst

Dec 2025 - Present

- Audited a fragrance technology startup's financial model to improve forecast reliability by correcting formulas and assumptions
- Selected through a ~2% acceptance process and completed 10 weeks of training in startup evaluation and investment analysis

International Business for Bruins

Los Angeles, California

Senior Consultant

Oct 2025 - Present

- Analyzed existing marketing and referral channels for a Los Angeles creative residency to identify key gaps in resident acquisition
- Developed tailored marketing recommendations to expand brand visibility and generate inquiries from prospective residents
- Represented the club at campus recruiting events, engaging students and generating 50+ new prospective-member sign-ups

SKILLS AND INTERESTS

Skills: Python, NumPy, PyTorch, C++, ROS, Computer-aided Design, Isaac Lab & Sim, Additive Manufacturing, Korean, Japanese

Interests: Ironman Triathlon, Snowboarding, Soccer, Tim Hortons Timbits, Shohei Ohtani, Volleyball, Basketball, Singing, Thrifting
